			ART UNIT	PAPER NUMBER
			3721	

DATE MAILED: 09/29/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

10/766,754

Applicant(s)

PERKINS, ANDREW

Examiner

Thanh K. Truong

Art Unit

3721

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 22 July 2005.  
 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.  
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-23 is/are pending in the application.  
 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.  
 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.  
 6) ☒ Claim(s) 1-23 is/are rejected.  
 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.  
 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.  
 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).  
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
 a) ☐ All b) ☐ Some \* c) ☐ None of:  
 1. ☐ Certified copies of the priority documents have been received.  
 2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.  
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)  
 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)  
 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
 Paper No(s)/Mail Date \_\_\_\_\_.  
 4) ☐ Interview Summary (PTO-413)  
 Paper No(s)/Mail Date \_\_\_\_\_.  
 5) ☐ Notice of Informal Patent Application (PTO-152)  
 6) ☐ Other: \_\_\_\_\_.

## **DETAILED ACTION**

### ***Election/Restrictions***

1. This action is in response to applicant's Response to the Election/Restriction received on July 22, 2005.
2. After carefully reviewing the Applicant's remarks filed July 22, 2005, traversing the Election/Restriction Requirement of June 28, 2005, Applicant's argument is found persuasive, accordingly, the requirement for Election/Restriction is hereby vacated. All claims have been examined on the merits.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-3, 5-11, 13-17 and 19-22 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-17 of copending Application No. 10/946,715. Although the conflicting claims are not identical, they are not patentably distinct from each other, because the

Art Unit: 3721

difference between both of the applications is that in the present application, the means engagable to produce a partial tearing on the material is applied at the edge portion, and in the copending application, the means engagable to produce a partial tearing on the material is applied at the central portion. It would have been obvious to one skilled in the art to have positioned the means engagable to produce a partial tearing on the material in any location, as they are obvious variations of the same invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 3, 5-7, 15-17, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Bolton (4,493,684).

Bolton discloses (figures 1-4) an apparatus and the method comprising: means (51) engagable with an edge portion of the material (10) for feeding the material at a predetermined speed, and a tear roller (55) having a surface that rotates faster than the predetermined speed (column 2, lines 33-35) and is intermittently engagable with the edge portion for exerting an abrupt periodic pull on the material which produces a partial

tearing of the material along the rows of perforations (column 2, lines 33-35 and column 3, lines 37-39) (as in claims 1, 6, 15 and 20).

Bolton further discloses: the means for feeding the material at a predetermined speed comprises a feed roller (51) with a surface in continuous driving engagement with the material (figure 3) (as in claims 3, 7 and 17); and the tear roller rotates faster than the feed roller (column 2, lines 33-35) (as in claims 5 and 19).

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2, 4, 8, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bolton (4,493,684) in view of Meschi (5,230,453).

As discussed above in paragraph 6 of this office action, Bolton discloses the claimed invention, but does not expressly disclose that the tear roller has an arcuate section and a section adjacent to the arcuate section, which remains out of driving engagement with the material, and the tear roller is larger in diameter than the feed roller.

Meschi discloses (figure 5) an apparatus and the method in which the tear roller (125, 126) has an arcuate section and a section adjacent to the arcuate section (127, 128), which remains out of driving engagement with the material, and the tear roller is

larger in diameter than the feed roller (figure 5). Meschi apparatus and method providing an efficient means to periodically causing a substantial tensioning on the material sheet to produce a tearing at the transversal pre-pierced straight line (column 6, lines 1-11).

Therefore, it would have been obvious to one having ordinary skill in the art, at the time applicant's invention was made, to have modified Bolton apparatus and method by incorporating the tear roller as taught by Meschi providing an efficient means to periodically cause a substantial tensioning on the material sheet to produce a tearing at the transversal pre-pierced straight line.

9. Claims 1, 9, 11, 13, 14 and 21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuss et al. (6,582,800) in view of Bolton (4,493,684).

Fuss et al. discloses an apparatus and method for making air-filled packing material from an elongated strip of preconfigured film having a plurality of uninflated chambers formed between two layers of the film with rows of perforations extending across the film between successive ones of the chambers, comprising: means (89) for injecting air between the layers of film to inflate the chambers and means (93) for sealing the chambers to retain the air therein.

Fuss et al. disclose the claimed invention, but did not expressly disclose the apparatus and the method for partially tearing the material along the edge portion of the rows of perforations after injecting the air into the chamber and sealing the chamber.

Bolton discloses (figures 1-4) an apparatus and the method comprising: means (51) engagable with an edge portion of the material (10) for feeding the material at a predetermined speed, and a tear roller (55) having a surface that rotates faster than the predetermined speed (column 2, lines 33-35) and is intermittently engagable with the edge portion for exerting an abrupt periodic pull on the material which produces a partial tearing of the material along the rows of perforations (column 2, lines 33-35 and column 3, lines 37-39).

Bolton further discloses: the means for feeding the material at a predetermined speed comprises a feed roller (51) with a surface in continuous driving engagement with the material (figure 3) (as in claims 3, 7 and 17); and the tear roller rotates faster than the feed roller (column 2, lines 33-35).

Therefore, it would have been obvious to one having ordinary skill in the art, at the time applicant's invention was made, to have modified Fuss et al. apparatus and method by incorporating the apparatus and the method for partially tearing the material along the edge portion of the rows of perforations as taught by Bolton, in order to provide means for making a packaging system which is capable of more rapid and economic operation.

10. Claims 10 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuss et al. (6,582,800) in view of Bolton (4,493,684) and Meschi (5,230,453).

As discussed above in paragraph 9 of this office action, the combination of the references of Fuss et al. and Bolton disclose the claimed invention, but do not expressly

disclose that the tear roller has an arcuate section and a section adjacent to the arcuate section, which remains out of driving engagement with the material, and the tear roller is larger in diameter than the feed roller.

Meschi discloses (figure 5) an apparatus and the method in which the tear roller (125, 126) has an arcuate section and a section adjacent to the arcuate section (127, 128), which remains out of driving engagement with the material, and the tear roller is larger in diameter than the feed roller (figure 5). The Meschi apparatus and method provides an efficient means to periodically cause a substantial tensioning on the material sheet to produce a tearing at the transversal pre-pierced straight line (column 6, lines 1-11).

Therefore, it would have been obvious to one having ordinary skill in the art, at the time applicant's invention was made, to have further modified the Fuss apparatus and method by incorporating the tear roller as taught by Meschi, providing an efficient means to periodically cause a substantial tensioning on the material sheet to produce a tearing at the transversal pre-pierced straight line.

### ***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh K. Truong whose telephone number is 571-272-4472. The examiner can normally be reached on Mon-Thru 8:00AM - 6:30PM.

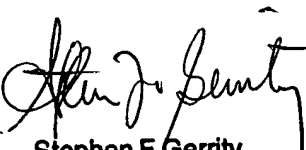

Art Unit: 3721

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
